

# Member news

The Argo Website has been updated. Go to [www.argoregistrars.com.au](http://www.argoregistrars.com.au) to review information on Courses, the Stryker Orthopaedic Outreach Award, Fellowships and Resources.

## Orthopaedic Outreach

**Stryker Sponsorships available to attend Outreach Expeditions in 2011** - Are you looking for an adventure and want to make a difference? There are trips planned throughout the Pacific to destinations including Tonga, the Solomon Islands, Samoa and Fiji. Check out the Outreach section of the Argo website for more details about expeditions and how to apply. Simply fill out the application form online and email it to [argo@stryker.com](mailto:argo@stryker.com)

## Courses

**SAVE THE DATE - Argo Knee Arthroplasty Cadaver Course (Sydney, 1-3 September)** - This course will be held in **Sydney** on **1-3 September** and will be convened by Mr Ton Tran. The full agenda, faculty and registration forms will be released at the end of April. In previous years, this popular course has sold out extremely quickly so be sure to register early to avoid disappointment. Please email [argo@stryker.com](mailto:argo@stryker.com) with an expression of interest.

**SAVE THE DATE - OTC Advanced Fracture Management Cadaver Course: Master's Techniques in Upper Limb Trauma (Brisbane 30-31 July)** - This cadaveric course is designed in particular for Set 4-5 Advanced Trainees and consultants, but is open to all. The registration form will be available shortly, but you can register your interest or request more information by emailing the OTC at [info@otcsouthpacific.org.au](mailto:info@otcsouthpacific.org.au)

## Resources

**Homer Stryker Centre Website** - The Homer Stryker Centre is Stryker's Global Education and Research network. The website was developed as an educational resource for Health Care Professionals and features many new learning technologies including surgical simulations and interactive surgical techniques. You will also find links to event calendars, excerpts from our world class lecture series and a host of other educational materials. To sign up today, go to [www.homerstrykercenter.com](http://www.homerstrykercenter.com)

**Are you looking for more information on US Fellowships?** - Go to [www.surgicalfutures.com](http://www.surgicalfutures.com) and sign up to review information and opportunities.

## Did You Know?

**Stryker's Triathlon Knee System** is designed to meet patients' expectations for Lifestyle Recovery. The intuitive and evolutionary design is predicated on the worldwide clinical success of millions of Stryker knee implantations. The Triathlon Knee System is designed to provide patients more natural motion and the potential for greater implant longevity.

The Triathlon Knee is an evolutionary design developed to more closely reproduce natural knee motion, designed to provide mobility with stability through 150+ degrees of flexion. To learn more about Triathlon and other Stryker knee systems please visit Stryker's product website on: [www.thetriathlondifference.com](http://www.thetriathlondifference.com)

**Let us know if your details change...** Send changes to [argo@stryker.com](mailto:argo@stryker.com) to ensure that we are able to keep you informed.
